More High Grades - More Gold
Mt Kare, PNG
Disclaimer & Competent Person Statement

This document comprises written materials/slides for a presentation of Indochine Mining Limited (‘Indochine’ or ‘the Company’). This presentation does not constitute or form part of any offer or invitation or solicitation to purchase or inducement to sell or issue any shares in the Company in any territory, state, country or nation. Neither this presentation nor any part of it shall form any part of, or be relied on in connection with, any investment decision in relation thereto. The information contained in this presentation reflects current legislation and the business and financial affairs of the Company which are subject to change without notice and audit, and is subject to the provisions contained within legislation and it is intended for distribution in Australia.

The information contained herein is for discussion purposes only and does not purport to contain all the information that may be required to evaluate the Company or its financial position. No reliance may be placed for any purposes whatsoever on the information contained in this presentation or on its accuracy or completeness or on opinions contained herein or communicated in relation thereto. No representation or warranty, express or implied, is or will be given by or on behalf of the Company or any of its subsidiaries (together, ‘the Group’), any member of the Group’s directors, officers or employees or their respective agents or adviser or any other person as to the accuracy or completeness of the information or opinions contained in this presentation and none of the foregoing accept any liability whatsoever arising from any use of this presentation, its contents or otherwise arising in connection therewith.

Certain statements in this presentation are forward-looking statements, which reflect the Company’s current expectations and projections about future events. By their nature, forward-looking statements involve a number of risks and uncertainties, many of which are outside the control of the Company, and the forward-looking statements involve subjective judgement and assumptions that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. These risks, uncertainties and assumptions could adversely affect the outcome and financial effects of the plans and events described herein. The Company does not undertake any obligation to update or revise any statements in this presentation including forward-looking statements. Given these uncertainties, readers of this information are cautioned not to place undue reliance on any forward looking statements.

The Company and its adviser makes no representation and gives no warranties to the accuracy or reliability of any information contained in this document and does not accept any liability for any loss caused by representations, errors or omissions on the part of the Company or by any of their respective officers, employees, authorised representatives or agents. In preparing this information, the Company did not take into account the investment objectives, financial situation and particular needs of the reader.

The Pre-Feasibility Study (PFS) results are indicative only. They are based on assumptions considered reasonable by Indochine and its external consultants, which may not all be ultimately achieved. Technical and economic estimates in the PFS are prepared to varying confidence of accuracies with an expectation of overall accuracy of ±30%. It should be noted that Indochine is not declaring an ore reserve estimate as part of the PFS, with this work being scheduled for the BFS. The PFS has scheduled production based on the December 2011 JORC Resource with expected mining parameters applied. The Company expects that the drilling undertaken, awaiting assay results, will aid in the future conversion of a reasonable proportion of the Resource material to Indicated status such that this can then be considered for conversion to an ore reserve as part of the BFS, which may not be ultimately achieved. In accordance with relevant regulations governing the disclosure of mineral projects, readers are cautioned that scheduled production based on resource material is considered speculative.

Competent Person Statement

Anthony W. Burgess, a qualified consultant for Indochine Mining Limited, is a member of the Australasian Institute of Mining and Metallurgy and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken, being reported herein as Exploration Results, to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code, 2004 Edition). Anthony W. Burgess has consented to the public reporting of these statements and results and the form and context in which they appear.
More High Grade Gold Drives Project

Bonanza Gold Zones - Confirmed
- Add substantial high grade ounces quickly
- Significantly enhances project economics and optionality

High Grade
- 21 m @ 34 g/t of gold; 71 g/t silver (Drill hole 183SD12)
- 1 m @ 1,335 g/t of gold; 155 g/t silver (Drill hole 122SD11)

Continued Focus on Drilling of Bonanza Zones

Large Scale
- Porgera comparisons (adjoining 28 Moz deposit, owned by Barrick)
- Both have bonanza grade ore zones and same geological setting
- Bonanza grades key to Porgera’s initial development

Upgraded Resource to Allow for Optimisation of PFS
- Range of development options at different grades and gold prices

High Grades Deliver High Value
Bonanza Grade Gold Zones

**Bonanza Zone** drill programme - two targets confirmed to date (Q1, 2013)
Both host bonanza-type gold mineralisation - (BZ, WRZ Zones)

Highlights include:

- 21 m at 33.8 g/t gold; 71 g/t silver (from 63 m, 183SD12)
  - Including 5 m at 105 g/t gold.

- 7 m at 35.2 g/t gold; 83 g/t silver;
  - Within 30 m at 9.6 g/t gold, 55 g/t silver (from 61 m, 185SD12);

- 14 m at 15.3 g/t gold, 9 g/t silver (from 36 m, 188SD13);
  - Including 7 m at 23 g/t gold.

Highest grade intercepted by IDC: 1 m at 1,335 g/t gold (122SD11).

Drilling continues to focus on this potential including additional targets.

Bonanza Zone Resources at Porgera - Key To Mine Development
Mt Kare And Porgera - Scale and Grade

Porgera - 28 Moz gold mine, owned by Barrick, produces >500,000 oz/yr (15 km from Mt Kare)

Both deposits formed at the same time in same geological setting

Both with high grade veins; confirmed by same Senior Resource Geologist, Tony Burgess, who discovered ~10 Moz reserves at Porgera

Porgera started on the high grade Zone VII resource - 5 Moz @ 27 g/t gold

Porgera production started at 72 g/t gold grades

Porgera produced more than 1 Moz p/a of gold for 5 years (1990-1995)

Maintained high grades as further bonanza zones were discovered

Porgera currently at a depth of ~1,000 m

Mt Kare is defined to a depth of ~350 m with significant potential to expand
Mt Kare and Porgera - similar geology

- Same geological setting and host rocks
- Same structural corridor
- Same age epithermal gold mineralisation
- Identical high grade veins
- Many untested targets

Discovery Of Bonanza Zones - Catalyst That Transformed Porgera Into a Top Ten Global Gold Mine
Flexibility in Development Options

- Pre-Feasibility Study Optimisation (completed Sept/Oct 2012)

- Flexibility to develop project at a range of grades and gold prices

- Upgraded resource coming (June) - current 1.8 Moz @ 1.9 g/t gold
  - Improved status expected (increase measured and indicated)
  - Current higher grade zones - 700,000 oz at 3.7 g/t gold

- Bonanza Zones identified near surface within prior open pit shell

- Surface gold potential exists - not in resource

Increased High Grades Near Surface - Increased Flexibility
PNG/Papua is host to world-class gold deposits totaling 250 Moz

History of successful resource development

Major Cu/Au & LNG projects underway

Key to PNG resource development:
- Landowner identification and engagement
- Tailing storage fully integrated into planned development
- Indochine well advanced in effectively identifying customary landowners to allow for planning of future development

Resource Rich Country With a Strong History of Successful Development
New Benchmark in Community Engagement

- Landowner investigation study completed; final report underway
- Objective to secure binding landowner agreement during mining lease process
- Benefits structured to reflect traditional systems - royalties, social infrastructure, etc.

George Niumataiwalu enabled the permitting of the Hidden Valley gold mine. He took the project through feasibility, permitting and landowner agreements.

George uses a Melanesian approach to secure community engagement and customary landowner identification critical to successful development.
Mt Kare - en route to another Porgera

Mt Kare
- Pre-Bonanza: Strong project, Undiscovered high grade zone
- Bonanza Zone Drilling: Targeting high grade zones, Similar to Porgera
- Post-Bonanza: Major high grade deposit, Development flexibility

Porgera
- Pre-Bonanza: Strong project, Undiscovered high grade zone
- Bonanza Zone Drilling: 5 Moz @ 1 oz/t, Production started at 78 g/t gold, GAME CHANGER
- Post-Bonanza: Top 10 gold mine, 30+ year mine life, High grades

Completing the Puzzle - Unlocking the Value

Support for Increased Grade and Scale - Mt Kare Gold/Silver Project
Compelling Investment Case

- Major project - with high grades & development options
- Bonanza Zones add high grade ounces quickly
- World class funds - focus on drilling high grade
- Optimise PFS with upgraded resource
- Options for development at different grades/scale
- Similar to adjoining major deposit - size/growth potential
Appendices
## History repeats - spectacular grade in past results

- **2012 Drill Programme**
  - 58 holes (7,790m) drilled since Nov 2011.
  - PFS results released
  - Project extensively drilled with 430+ holes at 30x30m centres
  - Wide intercepts of gold from surface
  - New Bonanza Zone drilling to be incorporated for a resource upgrade.
Bonanza Zones - Areas Confirmed

- Bonanza Drilling at BZ & WRZ (Yellow boxes)
- Bonanza mineralisation confirmed in both locations
- Drill extensions along favourable structures

Two Targets Confirmed to Date With Bonanza Style Mineralisation
Bonanza Zones Confirmed - WRZ & BZ

Two Bonanza Zones Targeted To Date and Both Confirmed

Bonanza Zones: eg. 21m @ 34 g/t Au; 5m @ 105 g/t Au (BZ)
14m @ 15 g/t Au (WRZ)
Bonanza Zones Confirmed - BZ Zone

- Confirmed bonanza style mineralisation in Feb 2013
- Breccia pipe on favourable fault and sandstone/limestone contact
- Oxidised to ~100m depth around bonanza zones
- Potential extensions down dip and along strike

Bonanza Zone (BZ) 21m @ 34 g/t Au; 5m @ 105 g/t Au
17.7m @ 100 g/t Au; 7m @ 35 g/t Au; 8m @ 10g/t Au;
Bonanza Zones Confirmed - BZ Long Section

- High grade shoots in elongate breccia pipes
- Shown in gram-metre gold mineralisation over 500 gram-metres
- Confirmed bonanza style mineralisation
- Breccia pipe on favourable fault and sandstone/ limestone contact

Bonanza Zone 21m @ 34 g/t Au; 5m @ 105 g/t Au (BZ)
14m @ 15 g/t Au (WRZ)
Bonanza Zones Location

New Bonanza Zone Targets Being Drill Tested at Present
Priority: near bonanza Au intercepts

Priority: East/West faults (Pink)

Extensions: favourable faults; south and north of resource (Orange)

Future: deep holes to test repeat structures
Mt Kare and Porgera - similar geology

- Same geological setting and host rocks
- Same structural corridor - Porgera transfer zone
- Same age epithermal gold deposits & two stage mineralisation
- Identical high grade veins & structure confirmed by competent person from Porgera, Tony Burgess
- Many untested targets

Discovery of Bonanza Zones - Catalyst That Transformed Porgera Into a Top Ten Global Gold Mine
En route to another Porgera

Untested Targets -
Mt Kare only drilled to 350m

Strong Pre-feasibility Study with Attractive Economics Completed in September 2012
Local infrastructure

- Access road (11km) to connect with existing road network
- Optimisation potential - gas/electricity & mini-hydro options
Significant Milestones Achieved to Date

- Acquired project
- Maiden JORC resource PFS started
- Landowner investigation study completed
- PFS completed
- First bonanza zone confirmed

- Secured experienced project manager & team
- Built camp
- Secured drill rigs and helicopter
- 1st drill results
- 7,790m drilling completed
- Start bonanza zone drilling (3,000+m)
Ongoing drilling of bonanza zones

Optimise PFS Development Options

Mining lease application

Secure project financing

**Stephen Promnitz**  
*Chief Executive Officer*

25 years experience in resource sector,  
Previously 2IC & Manager, Corporate  
Development at Kingsgate Consolidated.  
Investment bank work with Citigroup  
and Westpac. Over 15 years with  
Western Mining, Rio Tinto and Placer Dome.

---

**George Niumataiwalu**  
*PNG Country Manager*

Mining engineer with 20 years experience;  
previously PNG country manager for  
Morobe Consolidated Goldfields, steered  
Hidden valley through a full feasibility study,  
permitting and landowner agreements with  
24 months.

---

**Tony Burgess**  
*Chief Geological Consultant, PNG*

Tony’s career spans over 35 years of practical experience in all facets of geological exploration, grade control and resource/reserve estimation gold mining. Of particular interest is his 10+ year’s experience as the Senior Resource Geologist for the Porgera Joint Venture where he was the competent person for reserves at Porgera and responsible for resource definition of a world class epithermal gold/silver ore body.  
During his time at Porgera, Tony added nine million additional gold ounces to open pit and underground reserves.
Board

Ian W Ross
Dip Bus. (London) A.C.I.B. (UK)
Chairman &
Non Executive Director
Ian has over 45 years in the finance and mining industry in London, New York and Sydney. His roles included senior executive at the Ivanhoe Group of Companies throughout the world. Ian is currently Chairman and Non Executive Director of UCL Resources.

Stephen Gemell
BE Mining (Hons),
Fausim (CP) MAIME, MMCA
Non Executive Director
Steve Gemell has more than 35 years experience in the Australian and global mining industry. He has been Principal of Gemell Mining Engineers, and independent multi-discipline consultancy, since its formation in Kalgoorlie in 1984. Steve is currently Non Executive Chairman of Eastern Iron Limited and Golden Cross Resources Limited and a Non Executive Director of Argent Minerals Limited, Dateline Resource Limited and UCL Resources.

Gavan H Farley
Dip. Bus., MBA (Finance), MAID
Non Executive Director
Gavan has a career spanning 30 years in international management in the UK, Germany, USA, Africa and the Caribbean. Gavan is currently General Manager of Empire Securities Group, a Non Executive Director of Pilbara Mining Ltd and a Director of FCMS Holdings Inc. in the USA.

John T Shaw
Advisor to the Board
John Shaw has more than 40 years experience as a geologist, operating manager, senior executive and Independent non-executive director of mining enterprises in diverse cultural and political regimes in North America, Australia, PNG, Africa and Southeast Asia. He has significant experience in the world’s major mineral provinces and in diverse commodities, including gold, silver, copper and tungsten. He has extensive experience in exploration, evaluation, design, construction and operations. John was vice president of Australian operations of Placer Pacific, and managing director of Kidson Gold Mines and was involved in setting up and organising six PNG and Australian mines.

Dr Michael Leggo
PhD, MSc, BSc, DIC, FAIG, FAusIMM, FAAG, MEIANMZ
Non Executive Director
Michael Leggo has had a career in international mineral exploration and development and environmental and sustainability management. Throughout most countries of the Asia Pacific region, including PNG. His most recent executive position was for a PNG based energy company including a feasibility study. Previously as General Manager of Minerals Exploration and Development with CSR, Michael led the team which discovered three major mineral deposits in Australia and Indonesia (Granny Smith Au, Osborne Cu-Au, Lerokis-Kali Kuning Cu-Au), which were later placed in production. Other senior management and executive roles have been with AMAX, Boral and a number of junior mining companies.
### Mt Kare resource

#### Mt Kare project - JORC Mineral Resource Statement (Dec. 2011)

**Cut-off 0.5g/t gold**

<table>
<thead>
<tr>
<th>Resource Classification</th>
<th>Million Tonnes</th>
<th>Gold g/t</th>
<th>Silver g/t</th>
<th>Gold Moz</th>
<th>Gold Equiv*</th>
</tr>

<td>1.9</td>
<td>22.5</td>
<td>1.8 Moz</td>
<td>2.13 Moz</td>
</tr>
</tbody>
</table>

**Notes**
1) Cut-off grades: Nominal lower gold grade cuts are applied, and due to the nature of the deposit also approximate the geological mineralisation cut-off.
2) Material classified as Indicated Resources are within shells interpreted from the 2011 block model that define high grade Au mineralisation (+2g/t Au) which is close to surface. It is considered that material within these volumes have a high probability of being economically extracted, with the data risks considered.
3) Rounded estimates are used, which may cause apparent discrepancies in totals. Significant figures do not imply precision.
4) Gold equivalent grades (AuEq) are calculated based on a gold price of US$1200/oz and a silver price of US$22/oz, or 54.55 silver ounces per 1 gold ounce.

**Competent Person Statement**

Anthony W Burgess, a qualified consultant for Indochine Mining Limited, is a member of the Australasian Institute of Mining and Metallurgy and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken, being reported herein as Exploration Results, to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. (The JORC Code, 2004 Edition). Anthony W. Burgess has consented to the public reporting of these statements and results and the form and context in which they appear.
