

HIGHLIGHTS AND ACHIEVEMENTS

Mt Kare Gold/Silver Project PNG Funding The Development of High Grade Gold Zones

Finance

- A\$3.1M capital raising was completed at \$0.042 per share, to new and current shareholders;
- Indochine has been approached by potential investors seeking a joint venture (JV) investment in the Mt Kare Project, aimed to fund the project into production, linked to a cornerstone placement in IDC. Investment discussions are ongoing with several parties and the Company anticipates a conclusion in the near future;
- While discussions are underway with potential investors, work on site has been reduced until it becomes clearer that a joint venture will eventuate or the Company will continue to sole fund the project.

Landowner Investigation Report (LIR)

- Work continued on the LIR with government officials and Landowner clans.
- The final stage of the Landowner Investigation Study (LIS) was completed on-site at the Mt Kare Gold Project in January 2014 after more than two years of work. The LIS involved the marking of land boundaries by the identified primary landowners, validated by government officials and witnessed by relevant clans that have beneficial interest in these land boundaries. Key to this approach is the use of the 'malu', the clan's oral history developed over 15 generations, together with an assessment of genealogy, kinship, bloodlines, land use and customary criteria.
- The final phase of the Landowner Investigation Report (LIR) was work-shopped with government officials in Mt Hagen and is currently under discussions with the Hausman Clan. Once the LIR is accepted, rightful customary landowners and Indochine Mining can develop a socially responsible sharing of benefits with shareholders and Government.

Development of High Grade Gold Zones

- Initial work has been delayed on the underground drive (adit) and portal, for direct access to the high grade gold/silver zones as the Company advances its fundraising work and JV negotiations.

Underground Development Drive

- Initial work on the portal for an underground development drive (adit) has been delayed while the various finance discussions are advanced. Indochine is targeting an underground drilling programme and bulk sampling programme from an exploration adit. This is aimed at expanding the current 2.1 million ounces gold resource (42.5Mt at 1.5g/t Au 13.5g/t Ag for 2.1Moz Au, 18Moz Ag). Planned drilling is targeting the expected higher grade zones and to extend the zones down dip. The results of the adit development, drilling and sampling is planned to provide the project with robust data for mining and a feasibility study for a mining lease application.
